

Portfolio Development Diary

28th June 2025

- Began reading the project specification.
 - Identified key deliverables and mapped out a development timeline for the upcoming days.
-

29th June 2025

- Searched for design inspiration on LinkedIn, GitHub, and YouTube.
 - Experimented with different layout and styling ideas using basic HTML and CSS.
-

30th June 2025

- Started the actual development work.
 - Defined core sections to include: **About Me**, **Blog Posts**, and **Contact Me**.
 - Chose a clean, modern design approach.
 - Decided on a **sea green** color palette for consistency across the site.
 - Sketched initial layout ideas and outlined key interactions (like hover effects).
-

1st July 2025

- Set up the basic HTML5 and CSS3 structure for the site.
- Built a **fixed navigation header** with links to Home, About Me, Blog, and Contact.

- Added hover effects to navigation elements for interactivity.
 - Developed the footer with site links and social media icons.
 - Half of the header was completed, but not fully satisfied with the result.
 - Changed the color palette to a more vibrant **orangish yellow** for better visual appeal.
 - Completed and made the header **responsive**.
 - Worked on the **home page banner**, including media queries.
-

2nd July 2025

- Built the **About Me** section with a placeholder biography and visuals.
- Added dividers and created content cards to showcase educational qualifications with institution logos.
- Designed a **Download My CV** button with subtle hover effects (planned for further tweaks).
- Developed the **Blog Section**, using AI-generated titles and internet-sourced images.
- Finalized the **About** and **Blog** pages to be fully **responsive**.
- Added a **“View More Blogs”** button on the home page with hover styling.
- Initiated work on the **Contact Me** page using form elements.
- Updated the home page design by adding the **Newsletter Signup** section at the top.
- Finalized the contact form and polished the newsletter area.
- Refined all interactive elements including buttons, links, and form inputs for a smooth user experience across devices.
- Completed **page linking and navigation integration**.
- Footer and a few button elements still require slight adjustments.
