PROFILE

A loyal, reliable, and adaptable individual with strong communication skills, I excel in modernizing practices to maximize results while staying composed under pressure. Currently pursuing a Computer Science degree, I'm passionate about new technologies and trends. My analytical skills allow me to assess emerging tech and its impact on industries, and I effectively integrate advancements into organizational practices, delivering results with professionalism and integrity.

PROJECTS

Cinema Management System
Developed a comprehensive cinema management system that handled booking, scheduling, and seat allocation, enhancing customer experience and operational efficiency. This project strengthened my understanding of software design and database management.

DocGPT | Medical Ecosystem Prototype
Designed a prototype for DocGPT, a medical ecosystem intended to assist with patient care and medical record management through an AI-driven interface. The project focused on creating a user-friendly experience and exploring AI's potential in healthcare solutions.
