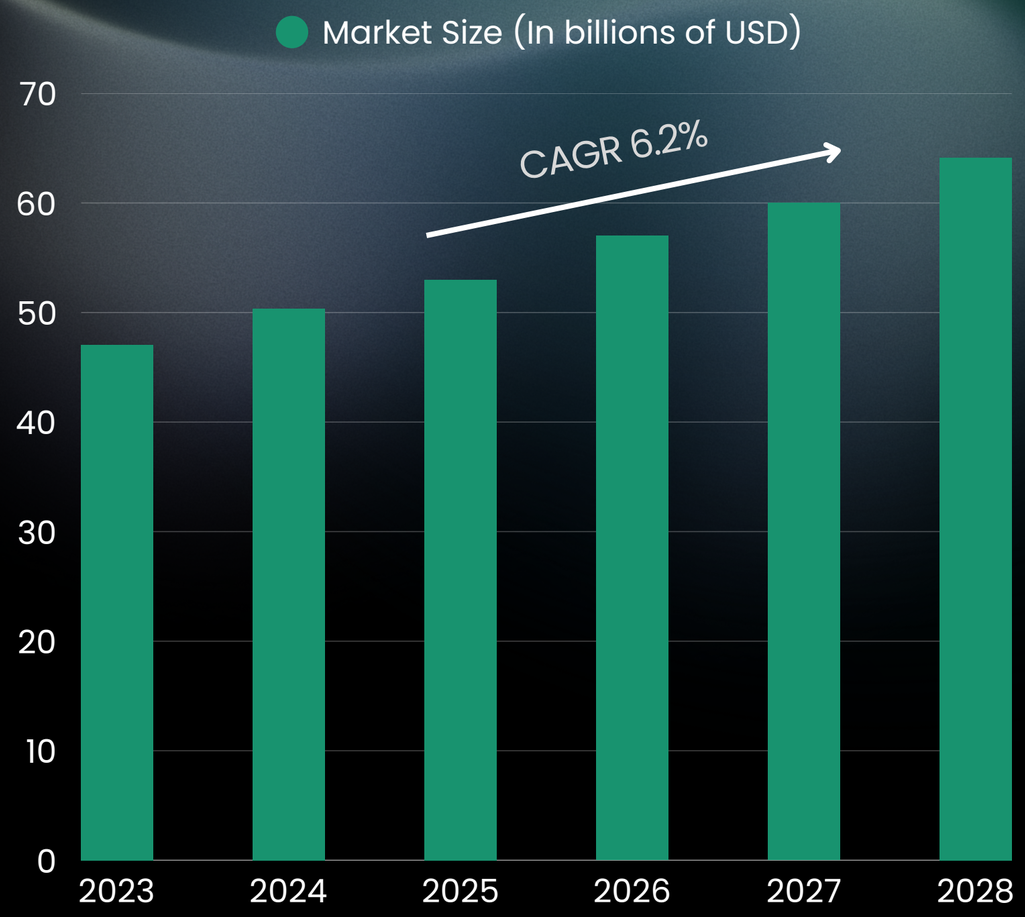
PhysioConnect

Heal Smart

Problem Statement

- Millions face challenges in managing physical injuries.
- Due to limited access to physiotherapy caused by cost, location, and time constraints.
- This gap leads to frustration, prolonged recovery, and increased risks.
- This highlights the need for an accessible, on-demand physiotherapy solution.

Market Potential



- Physiotherapy market to grow from $47.06B (2023) to $64.13B (2028)
- Growth drivers: Aging population, rise in injuries, demand for remote care.
- Trends: Use of AI, VR, wearables, and personalized physiotherapy.
- Opportunity: Leverage tech to meet growing demand for accessible, innovative care.

What is PhysioConnect?

- A virtual physiotherapy platform that breaks barriers like high costs and limited access, empowering users with:

- Personalized Care
- Recovery Tools
- Convenience
- AR Technology

How It **Works**

Sign up and provide previous health records if available

Monitor your pain and track your recovery

Choose pain points

Connect with Physiotherapists if the situation is critical

Get the customized remedies and tutorials for DIY aids

Keep track of progress and receive real time updates

How It **Works**

Target Audience

This gap leads to frustration, prolonged recovery, and increased risks, highlighting the need for an accessible, on-demand physiotherapy solution.

Professionals

Suffer posture-related issues due to sedentary work, needing ergonomic care.

Athletes

Struggle with injury management amidst tight schedules, risking re-injury.

Retirees

Face age-related mobility issues without access to guided, low-impact solutions.

Unique Selling Points (USP) – Why Us?

2D Model - Pain Mapping

Select injury areas and see muscle/tissue details.

DIY Recovery & Alternative Methods

No medication required.

Pain Monitoring & Progress Tracking

Personalized recovery.

Augmented Reality (AR) Guidance

Real-time posture correction.
